

NEW FEATURES

IMPROVED PICK RESISTANCE

Get ready to lock down your security game with the AP Euro! With its serrated anti-pick pins, driver pins, and sliders, this cylinder is a force to be reckoned with when it comes to fending off pesky picking attacks.

HANDED IS NO MORE

The addition of BSI 3-star engraving on both ends allows for the cylinder ends to be reversed, effectively altering the cylinder size. *Please note that training is necessary to action this process.

REMOVABLE TURN

With the inclusion of a removable thumbturn, not only do you gain convenience, but we have also designed and added the option of two additional thumbturn styles.

AP MASTER SYSTEM

Our APECS AP Series has undergone significant improvements. In addition to the Rim and Half options now available, we have also expanded our master keying capabilities, providing up to **156** differs under a simple master key system.

AP MODULAR SYSTEM

Quickly resolve sticky sizing situations with the APECS AP Series modular system.
